Forecast for Friday 10 Dec 2021

Weather: Showers initially frequent and heavy in the west with the risk of hail and thunder, but occasional and lighter in east. Gradually showers will ease from late morning, with most dry from early evening.

Chance of cloud free mountain/hill tops above 800m: Initially 20% in west and 50% in east, becoming from early evening generally 90%.

Visibility: Good or very good, sporadically becoming poor or very poor in showers, also in cloud with bases lowering 450m as showers push through.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Met Office Aberdeen Meteorologist's View
Some risk of blizzards in west across higher summits at first.

Forecast for Saturday 11 Dec 2021
Weather: Broad band of occasionally heavy rain and snow reaching from the west during the morning, before clearing erratically to the east during the afternoon, leaving showers for the evening. Snow level 500m lifting 1000m around mid-day, before lowering 700m in later showers. Gale, perhaps severe gales, bringing blizzards to higher summits.

Maximum wind: Southerly increasing mean 35mph from late morning with gusts 50mph across most exposed ridges and summits, veering west to southwest later.

Chance of cloud free mountain/hill tops above 800m: Initially 60% becoming 10% from late morning, then 80% from early evening

Visibility: Becoming generally poor or very poor as the area of rain and snow crosses, then sporadically in later showers.

Temperature: **Glens:** Minus 3 Celsius increasing 8 Celsius during the afternoon
At 800m: Minus 3 Celsius increasing plus 2 Celsius, before falling Zero Celsius later
Freezing level: 700m increasing 1100m, then falling 900m later
